

MELONXROCKET

MLNXR

WHITEPAPER

Introduction

- ▶ Breast cancer affect almost every family as it is the 2nd most form of cancer diagnosed in women but can also affect men.
- ▶ While substantial strides have been made in awareness and research to help in the diagnosis and treatment of breast cancer, there is one sector that has been left out...the survivors financial system.
- ▶ Survival rates have grown but so has the financial burden placed on many families and that is where we step in...
- ▶ Just because it isn't October, lets NEVER forget Breast Cancer Awareness!

What is MELONxROCKET?

- ▶ MELONxROCKET is the first crypto project to introduce a true burn and destruction of tokens while rewarding holders in MELONx tokens (www.melontokenbsc.com)
- ▶ Through this concept we introduce the power of a small cap to the amazing team and donation system that is MELONx which directly donated to survivors.

But how does it work?

- ▶ Unique burn tokenomics coupled with MELONx rewards this low gas deflationary token is set to lift off!
- ▶ True destruction of supply in every transaction. NOT REBASE but a burn that is removed from supply!
- ▶ Manual reward claim equals low gas.
- ▶ Supply reduction on every single transaction!
- ▶ Manual buyback to further reduce supply!
- ▶ 100% tokens to liquidity= no team or dev wallets!

How do I know my investment is safe?

- ▶ The MLNxR contract has many safeguards that include:
 - ▶ 2%/ 200million max holder
 - ▶ No double wallet transfers to push over
 - ▶ LP double locked within the contract and also Mudra (<https://mudra.website/?certificate=yes&type=0&lp=0x4f2102ab4cadfc59dcd17b0a84d6ac93fd4d61b7>)
 - ▶ LP lock will be extended yearly as we hit roadmap milestones
 - ▶ No Dev or Team tokens, they bough in just like you
